DATE-ISSUED: December 9, 1997

INVENTOR-INFORMATION:

NAME	CITY	STATE	ZIP CODE	COUNTRY
Papayannopoulou; Thalia	Seattle	WA	98144	

US-CL-CURRENT: 424/130.1; 424/140.1, 424/144.1, 424/156.1, 424/85.1, 530/388.85,
530/389.6

CLAIMS:

I claim:

1. A method of treating cancer in a patient comprising the steps of:
 - (1) peripheralizing CD34+ cells by administering an anti-VLA-4 antibody which blocks the binding of VLA-4 antigen on the surface of said CD34+ cells to VCAM or fibronectin;
 - (2) collecting peripheral blood containing the CD34+ cells by leukapheresis;
 - (3) enriching the CD34+ cells by immunoabsorption using anti-CD34 antibodies;
 - (4) administering chemotherapy and/or radiotherapy to the patient; and
 - (5) returning the enriched CD34+ cells to the patient's circulating blood.
2. The method according to claim 1, further comprising the step of administering a stimulating agent of CD34+ cell proliferation in vivo prior to leukapheresis, said stimulating agent being 5-fluorouracil or a cytokine that stimulates hematopoietic cells to proliferate.
3. The method according to claim 1, further comprising the step of expanding the enriched CD34+ cells ex vivo prior to returning the cells to the patient's circulating blood.
4. The method according to claim 2, further comprising the step of expanding the enriched CD34+ cells ex vivo prior to returning the cells to the patient's circulating blood.
5. The method according to claim 1, wherein the anti-VLA-4 antibody is selected from the group consisting of an antibody which is human, mouse/human chimeric, single chain, and humanized, or Fab, Fab', F(ab')2 or F(v) fragments thereof.
6. The method according to claim 1, wherein at least a portion of the

CD34.sup.+ cells are hematopoietic stem cells.

7. The method according to claim 2, wherein the cytokine is selected from the group consisting of G-CSF, stem cell factor, GM-CSF, M-CSF, T-SCF, SCPF, IL-1, IL-2, IL-3, IL-4, IL-6 and IL-11.
8. The method according to claim 7, wherein the cytokine is G-CSF.
9. The method according to claim 2, wherein the stimulating agent is administered before administering the anti-VLA-4 antibody.
10. The method according to claim 2, wherein the anti-VLA-4 antibodies is administered simultaneously with the stimulating agent.

530/389.6

CLAIMS:

I claim:

1. A method of treating AIDS in a patient comprising the steps of:

(1) peripheralizing CD34+ cells by administering an anti-VLA-4 antibody which blocks the binding of VLA-4 antigen on the surface of said CD34+ cells to VCAM or fibronectin;

(2) collecting peripheral blood containing the CD34+ cells by leukapheresis;

(3) enriching the CD34+ cells by immunoabsorption using anti-CD34 antibodies;

(4) administering chemotherapy and/or radiotherapy to the patient; and

(5) returning the enriched CD34+ cells to the patient's circulating blood.

2. The method according to claim 1, further comprising administering an anti-HIV agent to the patient prior to returning the enriched CD34.sup.+ cells to the patient's circulating blood.

3. The method according to claim 1, further comprising the step of administering a stimulating agent of CD34+ cell proliferation *in vivo* prior to leukapheresis, said stimulating agent being 5-fluorouracil or a cytokine that stimulates hematopoietic cells to proliferate.

4. The method according to claim 1, further comprising the step of expanding the enriched CD34.sup.+ cells *ex vivo* prior to returning the cells to the patient's circulating blood.

5. The method according to claim 2, further comprising the step of administering a stimulating agent of CD34.sup.+ cell proliferation *in vivo* prior to leukapheresis.

6. The method according to claim 2, further comprising the step of expanding the enriched CD34.sup.+ cells *ex vivo* prior to returning the cells to the

patient's circulating blood.

7. The method according to claim 1, wherein the anti-VLA-4 antibody is selected selected from the group consisting of an antibody which is human, mouse/human chimeric, single chain, and humanized or Fab, Fab', F(ab')2 or F(v) fragments thereof.

8. The method according to claim 1, wherein at least a portion of the CD34.sup.+ cells are hematopoietic stem cells.

9. The method according to claim 1, wherein the cytokine is selected from the group consisting of G-CSF, stem cell factor, GM-CSF, M-CSF, T-SCF, SCPF, IL-1, IL-2, IL-3, IL-4, IL-6 and IL-11.

10. The method according to claim 9, wherein the cytokine is G-CSF.

11. The method according to claim 3, wherein the stimulating agent is administered before administering the anti-VLA-4 antibody.

12. The method according to claim 3, wherein the anti-VLA-4 antibodies is administered simultaneously with the stimulating agent.

US-PAT-NO: 5843438

DOCUMENT-IDENTIFIER: US 5843438 A

TITLE: Peripheralization of hematopoietic stem cells

DATE-ISSUED: December 1, 1998

INVENTOR-INFORMATION:

NAME	CITY	STATE	ZIP CODE	COUNTRY
Papayannopoulou; Thalia	Seattle	WA		

US-CL-CURRENT: 424/130.1, 424/133.1, 424/135.1, 424/143.1, 424/144.1, 424/152.1, 424/153.1,
424/156.1, 424/85.1, 424/85.2

CLAIMS:

I claim:

1. A method of peripheralizing CD34.sup.+ cells *in vivo* comprising the step of administering an anti-VLA-4 antibody or an anti-VCAM-1 antibody which blocks the binding of VLA-4 antigen on the surface of the CD34.sup.+ cells to VCAM or fibronectin.
2. The method according to claim 1, wherein the anti-VLA-4 or anti-VCAM-1 antibody is a mouse/human, chimeric, single chain, or humanized or Fab, Fab', F(ab').sub.2 or F(v) fragments thereof.
3. The method according to claim 1, wherein at least a portion of the CD34.sup.+ cells are hematopoietic stem cells.
4. The method of claim 1, further comprising the step of administering a stimulating agent of CD34.sup.+ cell proliferation *in vivo*, said stimulating agent being 5-fluorouracil or a cytokine that stimulates hematopoietic cells to proliferated.
5. The method according to claim 2, further comprising the step of administering a stimulating agent of CD34.sup.+ cell proliferation *in vivo*, said stimulating agent being 5-fluorouracil or a cytokine that stimulates hematopoietic cells to proliferated.
6. The method according to claim 3, further comprising the step of administering a stimulating agent of hematopoietic stem cell proliferation *in vivo*, said stimulating agent being 5-fluorouracil or a cytokine that stimulates hematopoietic cells to proliferated.
7. The method according to claim 4, wherein the stimulation is mediated by a cytokine selected from the group consisting of granulocyte colony-stimulating factor (G-CSF), stem cell factor, granulocyte-macrophage colony-stimulating factor (GM-CSF), macrophage colony-stimulating factor (M-CSF), totipotent stem cell factor (T-SCF), stem cell proliferation factor (SCPF), interleukin-1 (IL-1), interleukin-2 (IL-2), interleukin-3 (IL-3), interleukin-4 (IL-4),

interleukin-6 (IL-6) and interleukin-11 (IL-11).

8. The method according to claim 5, wherein the stimulation is mediated by a cytokine selected from the group consisting of granulocyte colony-stimulating factor (G-CSF), stem cell factor, granulocyte-macrophage colony-stimulating factor (GM-CSF), macrophage colony-stimulating factor (M-CSF), totipotent stem cell factor (T-SCF), stem cell proliferation factor (SCPF), interleukin-1 (IL-1), interleukin-2 (IL-2), interleukin-3 (IL-3), interleukin-4 (IL-4), interleukin-6 (IL-6) and interleukin-11 (IL-11).

9. The method according to claim 6, wherein the stimulation is mediated by a cytokine selected from the group consisting of granulocyte colony-stimulating factor (G-CSF), stem cell factor, granulocyte-macrophage colony-stimulating factor (GM-CSF), macrophage colony-stimulating factor (M-CSF), totipotent stem cell factor (T-SCF), stem cell proliferation factor (SCPF), interleukin-1 (IL-1), interleukin-2 (IL-2), interleukin-3 (IL-3), interleukin-4 (IL-4), interleukin-6 (IL-6) and interleukin-11 (IL-11).

10. The method according to claim 7, wherein the cytokine is G-CSF.

11. The method according to claim 8, wherein the cytokine is G-CSF.

12. The method according to claim 9, wherein the cytokine is G-CSF.

13. The method according to claim 10, wherein the G-CSF is administered before administering the anti-VLA-4 antibody or anti-VCAM-1 antibody.

14. The method according to claim 11, wherein the G-CSF is administered before administering the anti-VLA-4 antibody or anti-VCAM-1 antibody.
